

**Sea Grant International
Background Paper #1 Feedback**

NOAA Research International, the National Sea Grant Office and the Coastal Resources Center are partnering together to assess the feasibility of adapting the U.S. Sea Grant model to countries in Latin America and the Caribbean. Part of this effort includes the preparation of “Background Paper #1” which details the basic components of the U.S. Sea Grant College Program and reviews a number of previous international research and extension efforts.

Your comments regarding the content and structure of this Background Paper are extremely valuable as Sea Grant begins to work toward the development of an international network of programs.

Do you feel this paper presents adequate information about the U.S. Sea Grant College Program?	
Based on your experience or the information presented in this paper, what components of the Sea Grant model do you feel are the most important to utilize when developing an international program?	
Are you familiar with any Research and Extension programs that were not covered in this paper?	
Is there any information in the Background Paper was unfamiliar or unclear?	
General Comments or Suggestions	

Your comments are much appreciated. Please return feedback sheet to Jill Hepp, Assistant Program Manager, NOAA Research International (jill.hepp@noaa.gov) phone: 301.713.2469 fax 301.713.1459
